DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Curtis et al. (U.S. patent # 6,545,884).

Decker et al. disclose the claimed subject matters a high duty cycle converter (figure 1-6,8-9,9A and 10-11), including a closed loop and variable signal (column 16, line 60-65) and derived as a function of the difference between the desired and measured signal (column 16, line 55-60), a current mode control (column 7, line 40-65), a preset time interval (column 11, line 15-45), a loss less switching (column 5, line 20-30), duty cycle is fixed in the range 90%-100% (column 10, line 1-15), an amplifier and comparator (column 6, line 15-30 and column 8, line 45-65) and a voltage clamp (column 13, line 5-20).

Allowable Subject Matter

3. Claims 13-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
